

 \pm Length of a tap bolt is measured from the underhead bearing surface to the extreme end of the bolt.

FULLY THREADED HEX TAP BOLTS ASME B18.2.1-1996

Low-Carbon Headmark

Grade-5 Headmark

Grade-8 Headmark

Description	Low CarbonTap Bolt: A low carbon, hex head bolt with a machined point which is threaded to the head. Grade-5 Tap Bolt: A tap bolt made from medium carbon steel. Grade-8 Tap Bolt: A tap bolt made from medium carbon alloy steel and heat-treated. Stainless Tap Bolt: A tap bolt made from 18-8 stainless steel.					
Applications/ Advantages	Low Carbon Tap Bolt: To be used in drilled and tapped holes which are threaded full length. Used instead of a stud and a nut. Grade-5 Tap Bolt: Used to mount motors to machinery; also popular in automotive and truck repair. Grade-8 Tap Bolt: Used in automotive and fleet industries where greater tensile strength is required than can be met by a grade-5. Stainless Tap Bolt: Used in in environments corrosive to carbon steel, in tapped holes that are threaded full length.					
Material	Low Carbon Tap Bolt: Shall be made from a steel conforming to the following chemical composition: Carbon- 0.33% max.; Manganese- 0.93% max.; Phosphorous: 0.041% max. Grade-5 Tap Bolt: AISI 1030 - 1541 or equivalent medium carbon steel. Use of an alloy such as 4037 modified steel is also acceptable. Grade-8 Tap Bolt: Medium carbon alloy steel. Note: For diameters 1/4 through 7/16 inch, it is permissible to use AISI 1541 steel. Stainless Tap Bolt: 18-8 Stainless steel					
Heat Treatment	Grade-5 Tap Bolt: Bolts shall be heat treated, oil or water quenched, at the option of the manufacturer, and tempered at a minimum tempering temperature of 800°F. Grade-8 Tap Bolt: Bolts shall be heat treated, oil quenched and tempered at a minimum tempering temperature of 800°F.					
Core Hardness	Low Carbon Tap Bolt: Rockwell B69 - B100 Grade-5 Tap Bolt: Rockwell C25 - C34 Grade-8 Tap Bolt: Rockwell C33 - C39 Stainless Tap Bolt: 1/4 thru 5/8™ diam: Rockwell B95 - C32					
Surface Hardness	Grade-5 Tap Bolt: Rockwell 30N54 maximum Grade-8 Tap Bolt: Rockwell 30N58.6 maximum					
Proof Load	<i>Grade-5 Tap Bolt:</i> 85,000 psi. <i>Grade-8 Tap Bolt:</i> 120,000 psi.					
Yield Strength*	Grade-5 Tap Bolt: 92,000 psi. minimum Grade-8 Tap Bolt: 130,000 psi. minimum Stainless Tap Bolt: 1/4 thru 5/8 [™] diam: 60,000 psi. minimum					
Tensile Strength	Low Carbon Tap Bolt: 60,000 psi. minimum Grade-5 Tap Bolt: 120,000 psi. minimum Grade-8 Tap Bolt: 150,000 psi. minimum Stainless Tap Bolt: 1/4 thru 5/8™ diam: 95,000 psi. minimum					
Elongation*	<i>Low Carbon Tap Bolt:</i> 18% minimum <i>Grade-5 Tap Bolt:</i> 14% minimum <i>Grade-8 Tap Bolt:</i> 12% minimum					
Reduction of Area*	Low Carbon, Grades 5 & 8 Tap Bolts: 35% minimum (all sizes)					
Plating	See Appendix-A for plating information.					

^{*} These properties are tested only on machined specimens when the testing machine cannot provide for full testing of the parts.

^{**}Product standards require the manufacturer's head marking to appear on the top of all bolts 1/4" diameter and larger. "X" represents one location such a marking may appear.
